

BANCADO PLUS+ Interface

Functions:

BANCADO developed the BANCADO Plus+ to interface with the Insight Banker Document Imaging System and the CheckView Check Imaging Systems. This provides a seamless direct interface between BANCADO, Insight Banker, and CheckView. Users can quickly retrieve documents such as loan contracts, driver's license, signature cards, etc. from Insight Banker with one-button access, without having to switch between two open applications. Using the same method, users can also retrieve check images from the CheckView check imaging system using the same one-button retrieval from within the BANCADO core system.
